EXECUTIVE 64

WE ARE WORKING ON GETTING AN EVALUATION COPY OF THIS FOR THE NEXT ISSUE. WE WERE DISAPPOINTED TO HEAR THAT THE DISK DRIVES IN THE EXEC HAVE NOT BEEN IMPROVED IN ANY SIGNIFICANT FUNCTIONAL WAY. NOR HAVE THE OLD RUMORS OF AN 8088 OR 86 CO-PROCESSOR OPTION COME TO ANYTHING. STILL, A SELF CONTAINED 64 WORK-STATION IS GOING TO TURN A LOT OF HEADS (INCLUDING OURS) WHEN IT HITS THE SHELVES LATER THIS YEAR.

CALC RESULT

HAND-RUBBED SOFTWARE?

BENN DUNNINGTON

One of the most useful and popular types of applications software being used today is the 'electronic spreadsheet' (VisiCalc being the original and best-known of these).

With the recent introduction of CALC RESULT, Handic Software of Sweden has given Commodore 64 users a very powerful spreadsheet (with some unique features) which will likely set the standard by which similar products will be compared for some time.

If you have never seen this kind of software before, an electronic spreadsheet is a kind of magic slate (or, in this case, a stack of magic slates) each consisting of numerous rows and columns of blank spaces. You say that's not much to write home about never mind paying the \$150.00? Ah, but we haven't got to the magic yet.

Let's say you own a fleet of 5 taxi-cabs, a calculator, a sharp pencil (with a new eraser), and a pad of paper. You decide to get organized and draw up a chart showing each cab, its annual fuel consumption, total miles driven, and MPG. You draw up a neat chart with rows and columns and a space for each entry (much like figure #). You enter your figures in the blanks, do your division with your punch-box and enter your MPG's for all five cabs. Then you decide to add all your fuel for a total and likewise your miles. Then, as a finishing touch, you make another set of entries for average fuel, miles, and MPG. Now your picture is complete.

With an electronic spreadsheet, you also fill in your boxes (called cells) with labels and values (typing on screen), but instead of entering the computed value for MPG, you enter the FORMULA (using the cell coordinates ie: B9/B8) - MPG is then computed automatically and placed in that cell (B11). Also, once you have defined this relationship for the Ford (in our example), a few keystrokes will replicate those 3 cells (and their relationship to each other) for all the other cabs. Next, enter the fuel and miles figures in the correct spaces, and the MPG will magically appear below. Now for your totals and averages, you need only enter the formula SUM (B8:F8) to total all the cells from B8 thru F8, and MEAN (B8:F8) to get the average of the same figures etc.

Now for the fun part: You learn that the figures for the Chevy were wrong-out comes the eraser. You rub out the figures, re-calculate the MPG and also rub out and replace the totals and averages. So-long neat paper. Oh-oh, the Toyota was wrong too (rub rub). Maybe you would even like to know what your averages would have been if the Ford had been another Toyota, but you're afraid the paper won't live thru it.

With a spreadsheet program, you can easily change individual values and instantly see the effects on all related cells. This is the main concept common to all spreadsheet programs: the ability to define cells dynamically in a grid based on the changeable values of other cells in the grid.

CALC RESULT goes one step (or rather one dimension) farther. Let's say your cab company wants to create a similar sheet for each of the last 10 years in addition to a master sum and average summary of all 10 years taken together. Most spreadsheets would not allow this, at least not conveniently, but CALC RESULT is 63 columns across, 255 rows down, AND 32 PAGES DEEP (the third dimension) with the last page automatically gathering the cumulative results. The page you already created is used as a 'template' to replicate your worksheet on any number of additional pages saving a great deal of time and reducing opportunities for error.

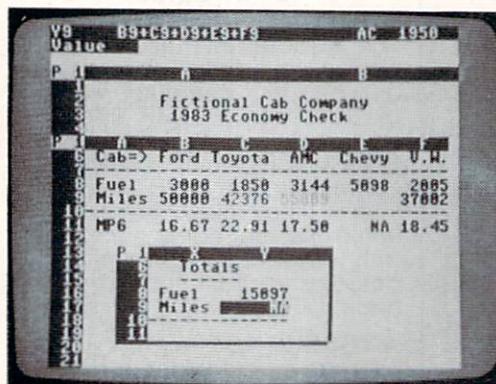

fig.1

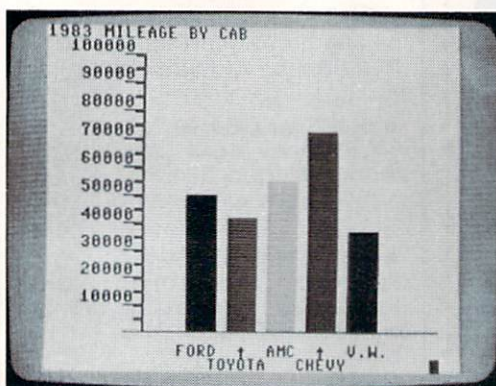

fig.2

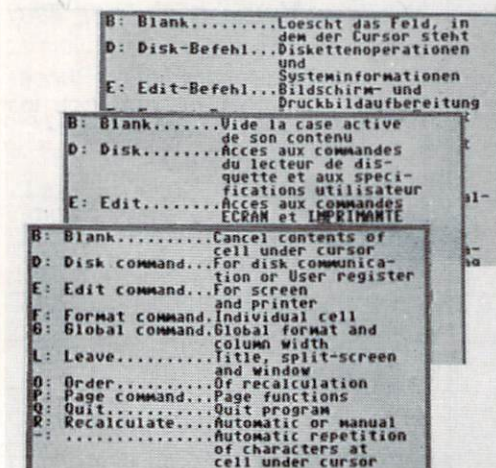

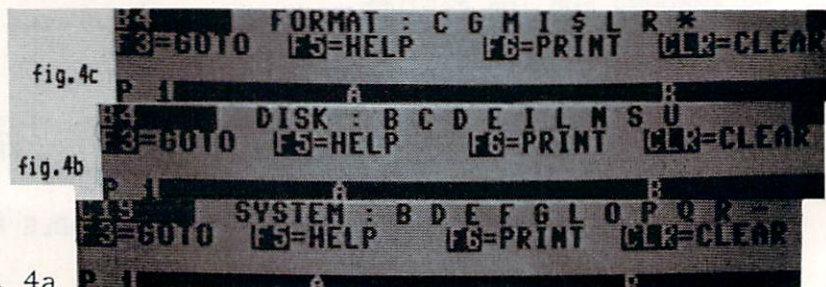

fig.3

A program of this nature can have all the muscle imaginable and still fail to be useful if it is confusing or difficult to manage with confidence. The value of CALC RESULT's high performance in this respect, while hard to quantify, cannot be over-emphasized. Much like the skillfully crafted furniture and tools for which the Swedes are renowned, CALC RESULT has a comfortable 'feel' and efficiency of design which makes it a pleasure to use regardless of the application.

CALC RESULT is loaded with features, many of them unique. Those familiar with the genre will notice that CALC RESULT more closely resembles Microsoft's Multiplan than VisiCalc in the range and utility of enhancements to the basic theme.

Important keys to CALC RESULT's ease of use are the menu lines and help screens. Whenever you wish to access functions other than entering information into a cell, you start by pressing the f7 function key (I am glad to see this key being used consistently by many different software developers). This will cause the SYSTEM menu line to appear at the top of your screen (see fig.4a). Any time you have a menu line displayed, you may GOTO a specified cell, PRINT an exact copy of what's currently visible on the screen (set-ups accommodate most printers including the 1520 CBM plotter), CLR the sheet completely (you will be asked to confirm this), use one of the single-letter commands from the menu, or get HELP.

When you press f5, a help screen will appear with explanations of your menu options. Help screens are currently supplied in English, German, and French. Fig.3 shows the help screen which accompanies the DISK menu line. Help screens are provided for SYSTEM, DISK, EDIT, FORMAT, GLOBAL, & PAGE commands. Many of the sub-commands have additional prompts, minimizing the need to refer to the manual.

At all other times, a status line is displayed which includes current cursor position, type of info in cell (value or label), the actual contents of the cell, the method of calculation, and memory remaining. The status line in fig.1 is showing the cursor at Y9, a VALUE of five cells added together, AC (Automatic calculation by Column) and 1950 remaining memory 'spaces' (not actually a byte-count, but when it is zero, you're out of work space).

This spreadsheet is huge (over a half-million cells are defined), and could not begin to be displayed in its entirety (a quick calculation indicates a bank of 3,401 monitors would do the job). Fortunately the authors have provided several handy features to make handling this giant a snap.

Screens may be SPLIT either vertically or horizontally. Once split, you may jump back and forth between screens, scrolling each separately in any direction. Scrolling may be synchronized in both screens or independent (one keystroke toggles this function). Column widths may also be different either side of the split. While the screen is split, changes in one zone are still reflected in visible affected cells in the other. Fig.1 shows a horizontal split at the 5th row. The small square below the split is a WINDOW.

WINDOWS are further subdivisions allowing additional parts of the worksheet to be brought into view. One window at a time may exist on the screen with up to one split outside the window and one inside. This allows four separate and simultaneous viewing areas. Inside the window you may again jump between splits and independently format screen zones. When you are finished with your splits and windows, 2 keystrokes return the screen to normal. Screen splits and windows not only allow distant cells to be brought conveniently into view, but may also be used to look at up to 4 different pages at once. In addition, the leftmost column (where titles usually go) may be protected (like an invisible split) causing it to remain untouched at the left while other columns go scrolling by. These features are extremely useful and easy to manage.

Color is another element put at your creative disposal. It is nice to color income cells green and expense cells red, for instance. These cells retain their hues in the graphics mode, creating color-coded bar charts (fig.2). Some color is used consistently by the program: notice the cell at Y9 in fig.1. Here a red "NA" (not available) has appeared due to the missing value in cell E9 which is required by Y9's formula (displayed at the top of the screen). The system also flashes the screen red when an error occurs.

GRAPHICS are simple, but effective and easy to use. Any column or row may be selected for graphic display. Only numeric cells will appear. You are prompted for the min and max values of your Y-axis and a title. The bars are then drawn to your scale, colors and all. You may scroll the graph left and right, label the X-axis to suit, and dump the screen to your printer or plotter.

Numerous MATH FUNCTIONS are built-in such as MIN, MAX, or MEAN of an area. NET PRESENT VALUE, TRIG functions, most scientific functions, BOOLEAN operations and IF THEN ELSE are all supported. The capability to load other files including VisiCalc files is claimed via the use of DIF (data interchange format). I have not had an opportunity to verify this, but expect no problem.

Extensive FORMATTING and EDITING facilities provide the user with great freedom to change and manipulate works in progress. Cells may be locally or globally formatted in many ways including integer, max precision, dollar(2 decimal), symbolic (a '5' becomes '*****'), and left or right justified.

The program comes with an excellent manual/tutorial. It is a cartridge/disk product so you may make as many backups of your disk(s) as you desire. The authors urge frequent backups and maintenance of 3 copies.

There are 2 minor bugs I uncovered. Neither is patently serious and should be easy to eliminate in future releases: 1) Loading the diskette is like crossing a street in Chicago. On power-up, the drive spins, you are prompted to insert the diskette, it stops for a heartbeat and begins whirring again. It cycles like this endlessly until it senses the diskette. You are thus required to poise your diskette at the drive door and, with considerable dexterity, slip it in quickly during one of the brief pauses. 2) When handling files you will often be asked to enter a file name. Under no circumstances should you enter a file name at this point! If you do the system will crash and you will have to cross that street in Chicago all over again, possibly minus some hard-earned data. What the system really wants is cursor movement to select a title from the directory OR a carriage return and THEN a file name. Keep this in mind and you will be O.K.

All in all, a remarkable piece of work which I can heartily recommend.

FLEXFILE 2.1

MICROVIEW

ARBY FULLER

FLEXFILE 2.1 (BY MICHAEL RILEY) MAY COME IN A PLAIN VANILLA WRAPPER, BUT WHEN IT COMES TO AN AFFORDABLE AND EASY-TO-MASTER DATABASE MANAGER, YOU WILL HAVE TO LOOK FAR TO BEAT IT.

THE PROGRAM IS COMPLETELY MENU-DRIVEN AND CONFIGURES ITSELF TO ANY CONCEIVABLE NON-VIC CBM SYSTEM YOU MAY HAVE. FLEXFILE 2.1 CAN USE A SINGLE DRIVE, 2 SINGLE DRIVES, DUAL OR HARD DISKS, AND ALMOST ANY PRINTER MADE.

THE MANUAL LOOKS INSUFFICIENT AT FIRST GLANCE, BUT IS ACTUALLY ONE OF THE MOST THOROUGH AND EASY TO USE MANUALS I HAVE EVER READ.

FLEXFILE 2.1 IS WRITTEN IN BASIC. IT IS SUPRISINGLY FAST IN SPITE OF THIS. THE ONLY TIME IT REALLY DRAGS IS DURING DIRECT FILE MAINTENANCE, SO MR. RILEY ADDED A BATCH ROUTINE THAT LETS YOU ENTER DATA AS FAST AS YOU CAN TYPE, AND THEN MERGES THE MORNING'S WORK WHILE YOU EAT LUNCH. THE PLUS SIDE OF A DATABASE MANAGER IN BASIC IS THAT YOU CAN WRITE CUSTOM SUBROUTINES AND MODIFY FLEXFILE 2.1. RILEY ENCOURAGES THIS AND PROVIDES PLENTY OF USEFUL DOCUMENTATION TO THAT END. THIS IS ALSO AN EXCELLENT PIECE OF SOFTWARE TO STUDY FOR THOSE THAT WANT TO LEARN FROM A GOOD EXAMPLE.

SOME OF THE MORE NOTEWORTHY FEATURES INCLUDE:

- * DYNAMIC FIELDS (NO NEED TO SPECIFY FIELD LENGTHS (IF YOU HAVE EVER FOUND OUT LATER THAT YOUR FIELD WON'T HOLD YOUR DATA, YOU KNOW WHAT A BOON THIS IS)
- * OVER 1000 127-CHARACTER RECORDS TO A FILE ON A 1541 (3 TIMES AS MANY ON AN 8050)
- * 79 CHARACTERS TO A FIELD.
- * SORT ON ANY KEY FIELD (NESTED SORTS TO 5 DEEP).
- * NESTED SUBTOTALS (5 DEEP).
- * SEND CONTROL CODES TO PRINTER FROM WITHIN THE PROGRAM.
- * SEARCH WITH UP TO 20 CONDITIONAL TESTS LINKED TOGETHER.

- * WILD CARDS & PATTERN-MATCHING.
- * CONVERT RANDOM FILES TO SEQUENTIAL FILES FOR USE BY WORDPRO, PAPERCLIP, ETC.
- * RESTRUCTURE FILES (ADD OR CHANGE FIELDS) WITH ONLY ONE DISK DRIVE AND A CASSETTE DECK.
- * SNAP-SHOT OF SCREEN TO PRINTER.
- * BROWSE ON ANY FIELD.
- * STORE AND RECALL REPORT FORMATS.
- * CALCULATED FIELDS IN RECORDS OR REPORTS.
- * MORE / MORE / MORE
- * THE ONLY DBMS I KNOW OF THAT COMES WITH A 'TRY IT, YOU'LL LIKE IT' MONEY-BACK GUARANTEE!

ONE ESPECIALLY NICE FEATURE IS THE ABILITY TO ADD LINES AT PRINT-TIME TO MAILING LABELS WITHOUT HAVING TO WASTE FILE SPACE STORING THEM. IE: YOU WANT TO SAY "ATTN: PURCHASING DEPT." ON EVERY LABEL. MOST DATABASES REQUIRE THAT THIS BE PART OF A FIELD OR A SEPARATE FIELD STORED IN EVERY RECORD. RILEY'S APPROACH SAVES SPACE AND CONTRIBUTES ENORMOUSLY TO THE FLEXIBILITY THE OPERATOR HAS.

ONE OTHER NICETY: THE SOFTWARE IS PROTECTED BY A DONGLE IN THE CASSETTE PORT, SO YOU MAY MAKE AS MANY BACKUP COPIES AS YOU NEED OF THE SYSTEM DISK.

**** NOTE **** FLEXFILE 2.1 SHOULD NOT BE CONFUSED WITH EARLIER VERSIONS OF FLEXFILE (WHICH HAVE BEEN REVIEWED ELSEWHERE) AND LACKED MANY OF THE FEATURES THAT MAKE 2.1 SUCH A WINNER.

FLEXIBILITY IS THE SINGLE RECURRING THEME THROUGHOUT THIS SOFTWARE, AND THE NAME FITS LIKE A GLOVE.

Wake up your
SID CHIP with

NOTE PRO

Music/Sound Synthesis
software for the C-64

You've heard the 64 make great sound effects and music. Now there's a way for you to create your own music and sound effects without learning a strange new language. While the competition forces you to program long alpha-numeric strings to achieve even the shortest piece of music, NOTE PRO is miles ahead, letting you compose on a simple TREBLE CLEF musical staff.

NOTE PRO I or NOTE PRO II is all you need in a music editor for the 64. But there is more. NOTE PRO BRIDGE is a machine language music and sound effects player that you can add to your own programs. It will play NOTE PRO Music files, or sound effects that you can create with simple formulae within your programs. With NOTE PRO BRIDGE, you can control the SID chip with machine language power, without knowing any machine language.

If you're into high resolution graphics then PLOT-A-LOT is a super buy! It allows you to create and save Hi-res screens and incorporate them into your own programs.

REVIEW:

SORCERER'S APPRENTICE

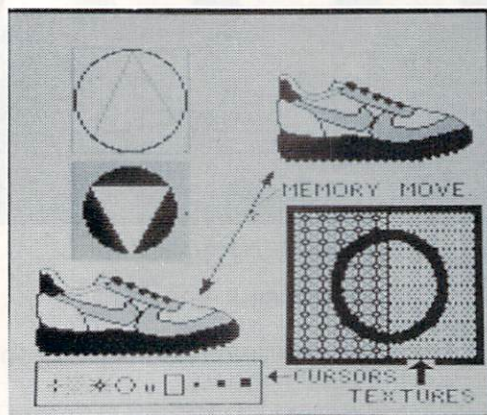

FIG. 1

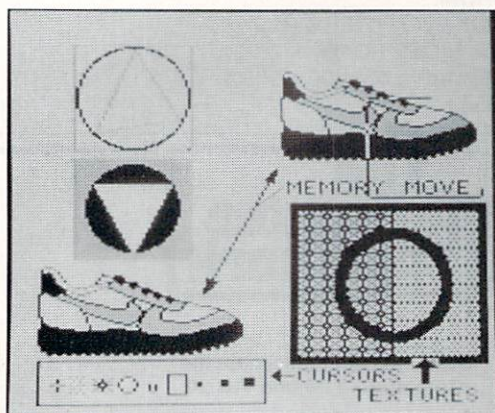

FIG. 2

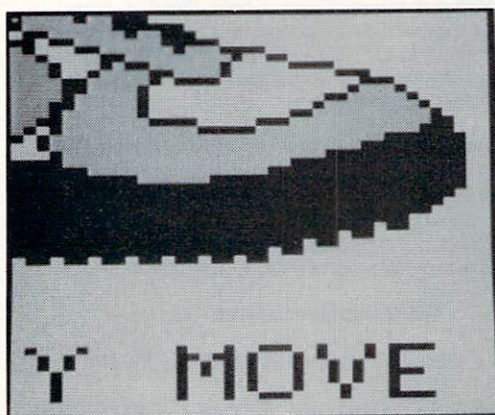

FIG. 3

REMEMBER WHEN YOU FIRST HOOKED UP YOUR 64 AND DROOLED OVER THE SPECIFICATIONS: "16 COLORS...HIGH-RES...320 X 200 BIT-MAPPED GRAPHICS ... SPRITES..." AND SO ON? REMEMBER HOW DISAPPOINTING IT WAS WHEN YOU FOUND OUT HOW HARD IT WAS GOING TO BE TO ACCESS ALL THOSE FEATURES FROM BASIC?

SORCERER'S APPRENTICE, WRITTEN BY ADAM BELLIN FOR EVENT HORIZON SOFTWARE IS A 'MUST' FOR ANYONE WHO HAS LONGED TO TURN THEIR COLOR MONITOR INTO AN ELECTRONIC EASEL AND UNLEASH THE ARTISTIC ANIMAL WITHIN THE 64.

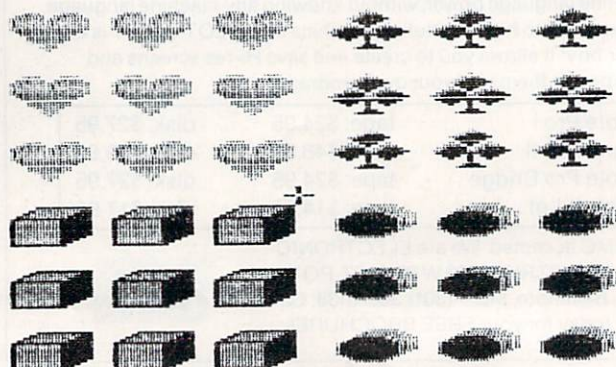

THE FIRST THING THAT STRUCK ME UPON OPENING THIS PACKAGE FOR THE FIRST TIME WAS THE SCANTY-LOOKING MANUAL WHOSE 7 QUARTER-SIZE PAGES EASILY HIDE IN A DISKETTE JACKET! AS I FIRED UP MY 64, HOWEVER, AND BEGAN PUTTING SORCERER'S APPRENTICE THROUGH ITS PACES, I SOON BEGAN TO WONDER IF A MANUAL WAS NECESSARY AT ALL! THE INCLUSION OF HELP SCREENS DESCRIBING ALL COMMANDS PLUS THE THOUGHTFUL DESIGN OF THE USER INTERFACE MAKE SORCERER'S APPRENTICE A DELIGHT TO OPERATE AND VIRTUALLY SELF-EXPLANATORY.

THO SIMPLE TO USE, THIS IS NOT A "SIMPLE" PROGRAM BY ANY MEANS. WRITTEN SKILLFULLY IN MACHINE LANGUAGE, SORCERER'S APPRENTICE IS POWERFUL AND VERY FAST.

AFTER LOADING, A COLORFUL TITLE SCREEN IS DISPLAYED; TOUCHING ANY KEY CLEARS THE SCREEN LEAVING YOU WITH A BLANK 'CANVAS' AND A CROSS-HAIR CURSOR IN THE CENTER AWAITING YOUR FIRST COMMAND.

YOU ARE NOW IN A GRAPHICS WORLD 160 DOTS WIDE BY 200 DOTS HIGH. THE MAIN TOOL AT YOUR DISPOSAL IS THE CURSOR. THE CURSOR IS YOUR LAYOUT PENCIL, TECHNICAL PEN, PAINTBRUSH, ERASER, RUBBER STAMP, AND POINTER ALL IN ONE. YOU MAY MOVE THE CURSOR IN A NUMBER OF WAYS; WITH THE REGULAR CURSOR KEYS, THE 'I, J, K, & M' KEYS, OR A JOYSTICK OR TRACKBALL (AND POSSIBLY A TOUCH-PAD) IN PORT # 2. I PERSONALLY FOUND THAT A SUCTION-CUP TYPE JOYSTICK (SUCH AS THE SPECTRAVIDEO 'QUICKSHOT') ANCHORED FIRMLY TO THE DESK-TOP NEAR MY COMPUTER WAS THE MOST COMFORTABLE AND GAVE THE MOST CONTROL. USING A HAND-HELD JOYSTICK IS AWKWARD BECAUSE ONE HAND IS OFTEN REQUIRED AT THE KEYBOARD FOR INVOKING A SCORE OF FREQUENTLY USED COMMANDS.

PRESSING THE JOYSTICK IN ANY DIRECTION WILL CAUSE A CORRESPONDING MOVEMENT FROM THE CURSOR. THE <RETURN> KEY TOGGLES BETWEEN HIGH-SPEED AND SLOW-SPEED CURSOR MOVEMENT. THIS IMPORTANT FEATURE ALLOWS YOU TO TRAVEL ABOUT THE SCREEN VERY QUICKLY AND THEN MAKE YOUR MARK WITH CONFIDENCE-INSPIRING ACCURACY. THE INCREMENT WITH WHICH THE CURSOR MOVES MAY BE SELECTED FROM THE NUMBER KEYS AT ANY TIME AND RANGES FROM A SINGLE DOT TO 9 AT A TIME. THIS IS USEFUL FOR MAKING GRIDS AS WELL AS TEXTURES WITH SOME OF THE DIFFERENT CURSORS. YES, THERE ARE 9 DIFFERENT CURSORS (SEE BOTTOM OF FIGURE 1) SELECTED BY THE <-> KEY (THERE IS ALSO AN INVISIBLE CURSOR IF YOU WANT).

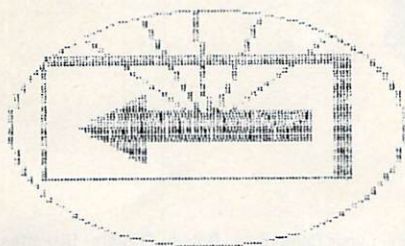

SORCERER'S APPRENTICE IS AVAILABLE FROM:
EVENT HORIZON SOFTWARE
PO BOX 1327
NEW YORK, NY 10028
(DISK 49.95)

DRAWING IS A SNAP WITH SORCERER'S APPRENTICE. TOUCHING <W> (WRITE) TURNS ON THE 'INK', <Q> (QUIT) TURNS OFF THE 'INK', AND <E> ERASES. NORMALLY THE CURSOR IS IN THE POINT MODE (PRESS <.)> AND DRAWS LINES OF ONE DOT THICKNESS. IN THE PAINT MODE (PRESS <P>), THE ENTIRE CURSOR LEAVES A TRAIL (THE BLACK CIRCLE OVER THE TEXTURES IS DRAWN WITH THE LARGE SOLID RECTANGLE CURSOR IN THE PAINT MODE - FIG. 1). TEXTURES ARE POSSIBLE (SEE FIG. 1) BY SELECTING AN APPROPRIATE CURSOR INCREMENT AND, IN PAINT MODE, DRIVING ONE OF THE CURSORS AROUND.

TO DRAW LINES BETWEEN POINTS, YOU POSITION THE CURSOR AT THE DESIRED STARTING POINT AND EITHER PRESS THE FIRE BUTTON ON THE JOYSTICK OR PRESS THE SPACE BAR. THIS 'SETS' THE ORIGINAL POINT. YOU THEN MOVE THE CURSOR TO THE DESIRED END POINT AND PRESS <F1>: AUTOMATICALLY, A STRAIGHT LINE IS DRAWN. THE ORIGIN POINT REMAINS SET UNTIL A NEW ONE IS SET ELSEWHERE, SO YOU CAN DRAW THINGS LIKE WHEEL SPOKES RAPIDLY BY SIMPLY MOVING THE END POINT ABOUT THE CIRCUMFERENCE AND PRESSING <F1> AT EVEN INTERVALS.

4 STANDARD GEOMETRIC SHAPES CAN BE DRAWN AUTOMATICALLY. ALL 4 CAN BE DRAWN EMPTY OR FILLED (SEE INSCRIBED SHAPES AT UPPER LEFT OF FIG. 1). RECTANGLES ARE DRAWN BY SETTING A POINT AT ONE CORNER, MOVING THE CURSOR TO THE DIAGONALLY OPPOSITE CORNER, AND TOUCHING <F2>. TRIANGLES SIMILARLY ARE DRAWN BY SETTING TWO POINTS, MOVING TO THE THIRD, AND PRESSING <F5>. TO DRAW A CIRCLE YOU SET A POINT AT THE CENTER, MOVE TO THE DESIRED RADIUS AND TAP <F7>, OR FOR AN ELLIPSE TOUCH <CTRL><F7>. EACH SHAPE WILL ALSO BE AUTO-FILLED WITH THE DRAW COLOR IF YOU USE THE SHIFTED FUNCTION KEY (IE <F8> FOR FILLED CIRCLE).

SCREEN DUMP OF FIGURE 1 USING CARDCO PRINTER UTILITY ROUTINE (@ MEMORY LOC.0) AND GEMINI 10-X PRINTER. NOTE VERTICAL SHORTENING OF IMAGE. PRINTER DUMP DECODES COLORS INTO BLACK, WHITE, AND A MEDIUM- GRAY.

IN ADDITION TO AUTO-FILLED GEOMETRIC SHAPES, YOU MAY FILL ANY SHAPE BY USING <CTRL><F> WHEN THE CURSOR IS 'INSIDE' THE SHAPE. AMAZINGLY, THE SHAPE DOES NOT NEED TO BE CLOSED TO FILL. IF YOU DRAW A GIANT 'V' AND WANT TO FILL IT WITH A COLOR, JUST EXECUTE THE FILL PROCEDURE AS DESCRIBED ABOVE- THE 'V' WILL FILL RIGHT TO THE TOP WITH COLOR AND STOP! ALL THE GRAPHIC FILLS I HAVE EVER TRIED ON OTHER SYSTEMS WOULD SIMPLY KEEP GOING AND PAINT THE ENTIRE SCREEN! THE OTHER SIDE OF THE COIN IS THAT SOME COMPLEX SHAPES WILL REQUIRE FILLING FROM MORE THAN ONE CURSOR POSITION TO COMPLETE.

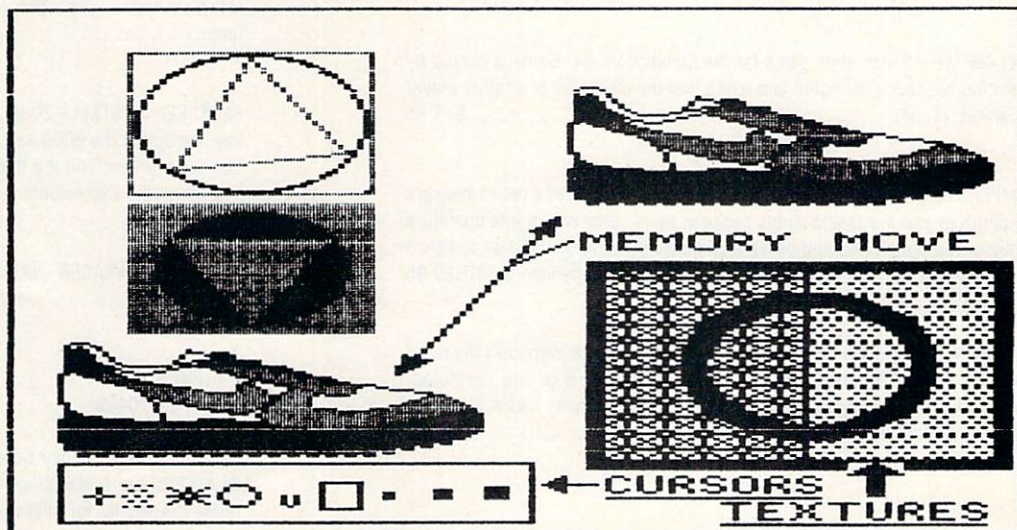

ARMED WITH ALL THE ABOVE FEATURES, YOU WILL NO DOUBT BE DRAWING SOME PRETTY FANCY STUFF. EVENTUALLY YOU WILL WANT TO GET MORE DETAILED WITH ONE PART OR ANOTHER OF YOUR DRAWING. PRESSING <CTRL><W> WILL CAUSE A 'WINDOW' TO APPEAR IN PLACE OF THE CURSOR (SEE UPPER RIGHT OF FIG. 2). THE WINDOW MAY BE MOVED JUST LIKE THE CURSOR. THE WINDOW REPRESENTS THE AREA THAT WILL FILL THE ENTIRE SCREEN WHEN YOU TOUCH THE <RETURN> KEY. IN FIG. 3 YOU CAN SEE THE SCREEN PRODUCED BY ACTIVATING THE WINDOW IN FIG. 2. IN THIS MAGNIFIED MODE YOU HAVE ABSOLUTE CONTROL OF UNIT DOTS.

YOU MAY HAVE NOTICED TWO IDENTICAL JOGGING SHOES IN THE PICTURE. NO, I DIDN'T HAVE THE PATIENCE TO DRAW BOTH. I DREW ONE AND USED THE LAST AMAZING FEATURE OF THIS SYSTEM- MEMORY MOVE. TO REPLICATE AN OBJECT, YOU SIMPLY SET POINTS AS IF TO DRAW A RECTANGLE, ONLY INSTEAD OF F3, YOU USE THE UP-ARROW AND SUDDENLY, ANYWHERE YOU MOVE YOUR JOYSTICK, A REPLICA OF THE CONTENTS OF THE RECTANGLE FOLLOW, LEAVING THE ORIGINAL IN PLACE! TO DROP OF THE COPY, JUST TOUCH <RETURN> WHEN IT'S WHERE YOU WANT IT.

TWO IMPROVEMENTS WOULD REALLY COMPLETE THIS PACKAGE FOR ME. FIRST, AN ON-SCREEN DIRECTORY ROUTINE SO I WOULDN'T HAVE TO RELY ON MY MEMORY FOR STORED DRAWING NAMES. ALSO AN UN-FILL COMMAND WOULD REALLY BE NIFTY (FOR THOSE OF US WHO LIKE TO CHANGE OUR MINDS.) ERASING IS JUST TOO SLOW.

ALL IN ALL, ONE OF THE NICEST LITTLE PRODUCTS I'VE SEEN THIS YEAR.

Each product title is accompanied by a 3-character code representing the manufacturer or primary agent (a complete list of which follows this article), media (where applicable), price, availability, and a rating in the form of from 1 to 5 stars. Only products which Info-64 has tested are rated (others receive 'N.A.'). Ratings are our best attempt to sum up the combined quality of the product's performance, ease of use, error-handling, and documentation. It is left to the reader to judge the VALUE of a product by comparing price against quality. ====>> THE INFOCOM ADVENTURE SERIES ARE THE LEADING TEXT-

BASED ADVENTURE GAMES. THEY ALL INCORPORATE A VERY
POWERFUL LANGUAGE INTERPRETER (PARSER) WHICH HAS A
VOCABULARY OF ABOUT 600 WORDS, ALLOWING INPUT OF WHOLE AND
MULTIPLE SENTENCES INCLUDING ADJECTIVES (IE: TAKE THE ROUGH
OBJECT AND THE LONG DEVICE. PUT THE OBJECT AND THE DEVICE
IN THE OPEN CONTAINER.). THIS IS VERY IMPRESSIVE TO
EXPERIENCE AND GIVES AN UNCANNY SENSE OF INTELLIGENCE IN
THE MACHINE. (INFOCOM EMPHASIZES THAT GRAPHICS HAVE BEEN
DELIBERATELY OMITTED TO ENHANCE THE USE OF THE
IMAGINATION. WE FEEL IT IS MORE LIKELY DUE TO THE
DIFFICULTY & EXPENSE OF WRITING GRAPHICS ROUTINES FOR THE
WIDE NUMBER OF SYSTEMS WHICH THEIR GAMES WILL RUN ON NOW.
WE FEEL THAT SIMPLE GRAPHIC ON-SCREEN MAPPING WOULD AD
TREMENDOUSLY TO THESE OTHERWISE EXCELLENT GAMES AND NAIL A
5-STAR RATING TO BOOT!)

CURSOR

For your Commodore 64

For only \$12.95 each, our **CURSOR 64** tapes are your best buy for the Commodore 64. They take advantage of the color, sound, and sprites that make the 64 such a delight to use. Most of our packages include three excellent Basic programs on one cassette tape. The programs are not copy protected, so you can look at the source code, and learn how to make the 64 do its tricks.

We don't have room to describe all 25 of our **CURSOR 64** programs here. As a sample, you may want to order tape 64-5 with the exciting **Godzilla** program. You'll be challenged as you try to save Tokyo from the rampaging Godzilla. Or try tape 64-3 with the popular **Miser** text adventure that will take you hours to solve (even if you cheat and read the program source).

We have super programs for the VIC 20, such as **Dungeon** (\$12.95), a visual adventure for 16K VICs. Our **VIXEL** programs are also popular with VIC owners. And, we still sell all 30 of the original **CURSOR** cassettes for the original PET and CBM.

Call or write for a catalog today. Be sure and tell us whether you have a 64, a VIC, or a PET. We welcome credit cards, and ship most orders the same day they are received. Dealer inquiries invited.
